RESORT COMMUNITIES

RBF Consulting (RBF) offers a comprehensive selection of construction-related survey services to clients throughout the Southwestern United States and Mexico.

Professional services include all disciplines of Land Surveying related to site control and layout for major infrastructure; transportation facility projects; master planned residential communities; commercial, industrial and public facilities development.

By focusing on the specific needs of each client, RBF seamlessly integrates field survey operations into the construction process. Office support calculations and electronic data transfers assure high levels of operational efficiency. Thorough records are maintained in hard copy and digital formats. RBF's construction surveying expertise provides detailed accurate information that can result in significant time and cost savings to our clients.

RELATED SURVEY SERVICES

RBF Consulting (RBF) provides clients with a unique surveying edge throughout the project cycle. This is accomplished by combining traditional surveying techniques with advanced surveying technology. Offices are equipped with state-of-the-art technology such as Real Time Kinematic (RTK) global positioning system equipment. Highly trained professional staff and the latest in technology enable RBF to provide increased productivity and innovative solutions for clients. Surveying services include:
