RBF Consulting (RBF) is a multi-discipline firm specializing in water and wastewater engineering, including the design of treatment facilities. RBF water and wastewater experts are assisted by members of the firm's structural, electrical, instrumentation, and civil departments. The RBF team has designed many water treatment facilities throughout the western United States.

RBF is well versed in the regulatory maze of federal, state and local laws governing treatment plants. RBF's advanced planning staff can help a client determine the optimal steps to meet future changes and update existing facilities.

Projects have included siting studies, preliminary design and cost reports, design of upgrades to existing facilities and design of new facilities. The firm also assists clients with local and federal waste discharge permits and environmental documentation.

Additional support services include:

- *Environmental Studies & Impact Reports*
- *Siting Studies*
- *Construction Management*
- *Pilot Plants*
