RBF Consulting's (RBF) experienced, quality conscious professionals have been meeting engineering challenges in California, Arizona and Nevada. The firm is a leader in the field of Water Resources Engineering and provides a full range of professional services including water quality analysis, hydraulic computer modeling, regulatory compliance, and design and construction support services.

RBF has extensive experience in developing practical and cost effective solutions to water resources design challenges. A proven innovator of creative ideas, RBF provides technical excellence in planning, financing, design and construction of water supply, wastewater treatment, and water reclamation facilities.

Typical work products include distribution and transmission main design, pumping stations, flow-control facilities, reservoirs, unit processes, and water and wastewater treatment plants.

A partial list of related services include:

- *Civil Site Work*
- *Structural Engineering*
- *Construction Management & Inspection*
- *Electrical Engineering*
- *Economic Analysis*
- *Instrumentation & Control*
- *Surveying & Mapping*
- *Cathodic Protection*
- *Environmental Analysis*
- *Regulatory Processing*
- *Landscape Architecture*
